## USER INTERFACES

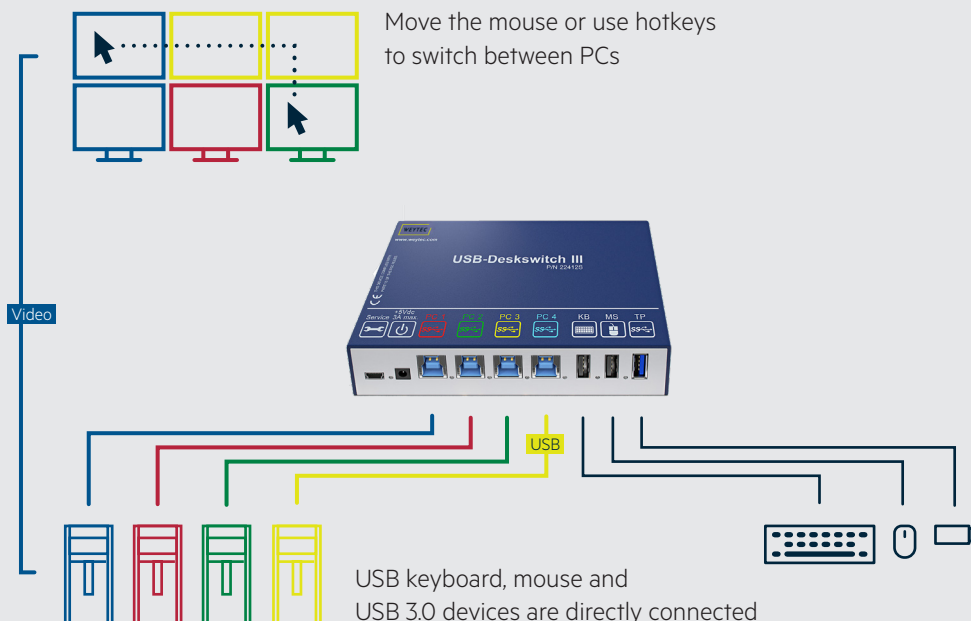

# USB Deskswitch

The **USB Deskswitch** is a KVM switch that enables users to control all the computers at their desk using a **single keyboard and mouse**. Operators and traders enjoy a fully-integrated environment with intuitive switching between different sources by moving the mouse cursor across the border of a screen. Add extra functionality with value-added Network Copy-Paste software.

- Up to 4 PCs with a single USB Deskswitch
- Up to 16 PCs with multiple Deskswitches
- Individual hotkeys for different sources
- Mouse switching with multi-resolution support (no software required for single-screen sources)
- Network Copy-Paste to share clipboard information between PCs in the same network (optional)
- Access USB 3.0 devices from up to 4 PCs

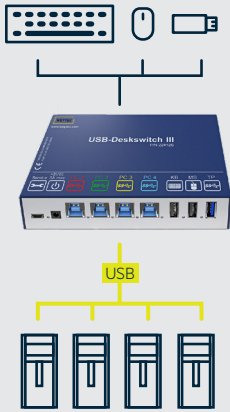

## Functionality

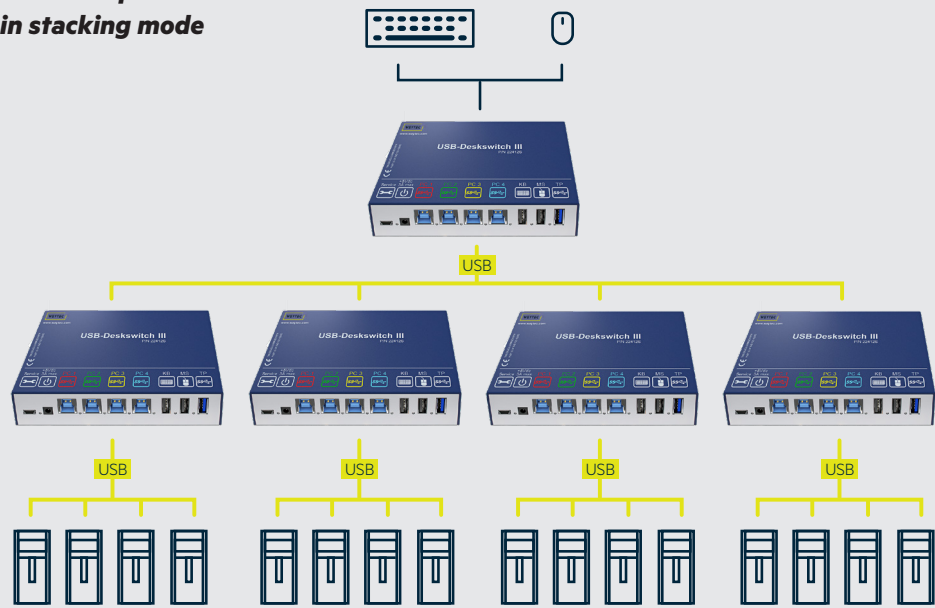

## Use Cases

### Connect up to 4 PCs directly

### Connect up to 16 PCs in stacking mode
